Mr. Rupert, see the emails below.

Ex. 5 - Deliberative

Sorry to bug you on a weekend.

Happy Easter!! Den.

Ron, passing this as a heads-up....sounds like Mathy is expecting a report from OEM and/or the Region on Monday. Not sure if he passed that expectation on to Shawn.

In his note below, Tito is referring to the questions Mathy raised on the Thursday call about why we did methane isotopic sampling/analysis. Tito advised me this morning that after the call Mathy and Lisa F kind of peppered Dana about the sampling and why it occurred. Now as I said above it sounds like he is expecting some type of report on Monday.

In the meantime, I spoke to Rich Fetzer and Jerry this morning and they had the same recollection of why we did the sampling as all of us did when we discussed during and after the call. Fetzer was going to connect with Rupert about ORD sampling plan and whether the methane isotopic is in that. I have not heard back but will follow-up over the weekend.

I assume we can deal with this Monday morning since there's not a lot more to say. But if you hear or believe differently let me know.
Thanks, den.

Subject: Follow-up to our call this morning ...

Hey Den:

Just got off the phone with Dana T. Mathy has communicated with her a couple of times today and is definitely expecting information early on Monday on the matter discussed during the call yesterday afternoon.

You think we can look for some kind of summary explanation on Monday morning ?

As always, don't hesitate to call me if we should discuss.

Thanks,

Tito
